Re: [redacted]

~~PERSONAL AND CONFIDENTIAL~~

Dear Sir: Attention: Assistant Director S. J. Tracy

Enclosed are telegraphic messages [redacted] inclusive,
some of which are [redacted]

b7E

With regard to those [redacted] it is requested that this office be furnished with two copies on onion skin paper of complete translations and that a separate sheet be used for each message if practicable. It will be noted that they are numbered chronologically. It is requested that the translations be numbered to conform with the message enclosed herewith.

With regard to those [redacted] it is requested that the Bureau attempt to furnish [redacted] to this office in the same manner as outlined above with regard to those [redacted]. In addition, in the event it is found such messages [redacted] it is requested that the messages be copied as they are and that copies of the messages [redacted] be returned as outlined above. This additional request is made at this time for the reason that the Bureau may be in a position at a later date [redacted] and furnish [redacted] text to this office. At such time the [redacted] returned to this office will be destroyed and the [redacted] messages inserted numerically in our message file. In this way we will be able to examine a complete file of these messages over a long period of time and when considered with other information already available, develop a more accurate picture [redacted] if any exist, with regard to these persons in this Field Division.

b7E

If any [redacted] messages in the English language are included in the enclosures, it is requested this office simply be supplied with two copies numbered to conform with the enclosures.

It is my thought that the above plan will not only supply this office with a complete message file regarding these persons as mentioned above but that the originals retained in the proper Bureau files will, when correlated with other information already there, be of considerable value to the Bureau [redacted] in this country, in supplying [redacted] Field Offices with investigative material, and possibly in connection with certain other activities.

In Response to our request, the New York Office has advised that it has received the assurances of the Cable Censorship that all such messages are being turned over to the FBI Liaison Agents. As each subsequent request has been received from the Laboratory, it has been transmitted to the Cable Censorship. We are now informed by the Chief Cable Censor that all Cable messages we have requested are being furnished to us. It is noted that there has been an indication that the Laboratory does not feel that all messages are being received. I do not feel that we can go behind the assurances of the Cable Censor that we are getting all the messages. If any such evidence that we are not getting these messages comes to the attention of the Laboratory and if it is transmitted to us, I shall be very glad to take the matter up with the Cable Censorship.

Dear Sir: Attention: Assistant Director S. J. Tracy

Enclosed are telegraphic messages [redacted] inclusive,
some of which are [redacted]

With regard to those [redacted] it is requested that this office be furnished with two copies on onion skin paper of complete translations and that a separate sheet be used for each message if practicable. It will be noted that they are numbered chronologically. It is requested that the translations be numbered to conform with the message enclosed herewith.

With regard to those [redacted] it is requested that the Bureau attempt to furnish [redacted] to this office in the same manner as outlined above with regard to those [redacted]. In addition, in the event it is found such messages [redacted] it is requested that the messages be copied as they are and that copies of the messages [redacted] be returned as outlined above. This additional request is made at this time for the reason that the Bureau may be in a position at a later date [redacted] and furnish [redacted] text to this office. At such time the [redacted] returned to this office will be destroyed and the [redacted] messages inserted numerically in our message file.
